

As leaders in
the market, we
provide textile
solutions with
pioneering and
excellency.

Who We Are

Having more than 60 years in the market, Delfim stands out as a national and family industry that provides textile solutions, a pioneering in the manufacture of tulles, frame cotton tulles and mosquito nets in the country.

Founded on July 25, 1958 in São Paulo, Delfim started as a manufacturer of velvet and lace. In the 70's, in its first expansion, it included tulles, mosquito nets and cotton tulles in its portfolio. More options came into life in the following decades, with products such as embossed curtains and towels.

All this tradition allowed Delfim to improve its quality standards, providing the best solutions and services.

The company also keeps up with market trends and needs, which allows the development of private label products, as well as specific dyeing and finishes thanks to the dyeing sector and increasing manufacturing sector, equipped with next-generation machinery.

Besides massive investment in technology, Delfim focuses on customized and excellency services and seeks to understand customer demands and suggest optimal solutions.

Delfim values and respects the entire textile chain, from fiber acquisition to fabric retail. Fabrics are traceable in every process step and submitted to a strict quality control, until being shipped to customers. All processes are handled with care by employees, ensuring that all steps are completed with excellency.

Mission

Excellency, tradition industry that shows respect to the entire textile chain.

Vision

Be a recognized brand in textile innovation and solutions

Values

- Care with customers, employees, suppliers, shareholders and society - all deserves care and respect;
- Perceived quality: Our products and services must be promptly recognized by stakeholders;
- Healthy environment: we take extreme care to ensure that all our manufacturing and commercialization actions preserve the environment, families and surrounding communities;
- Our operation and business are guided by ethics and win-win relationship.

Purpose

Inspire and provide the best textile solutions to production chain and society.

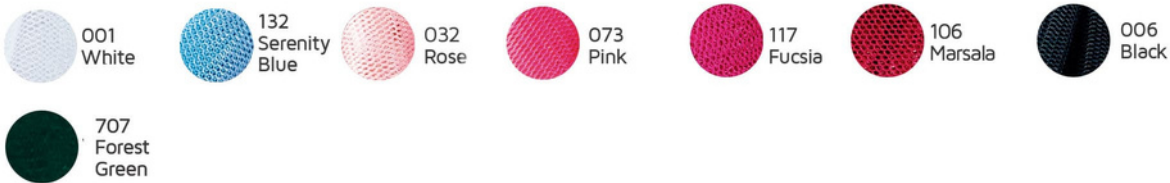

Culture

Environment that encourages new ideas, innovations, transparency, people development and team spirit.

Concept Tulle

The Concept Tulle is a brand new fabric in the market, which becomes an innovation concept. It allows for the creation of unique pieces, adding characteristics of lace or embroidered fabrics, however, with lightness, delicacy, and transparency.

Color Palette

Benefits

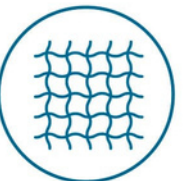

Perfect for contact with the skin.

Lighter trimming

Cool touch

Mechanical elasticity (greater durability)

Delfim Protect

É um tecido revolucionário. Versátil, é capaz de matar o coronavírus Sar-CoV-2 e outros vírus em um minuto. O DelfimProtect tem como diferencial a tecnologia empregada na construção dos fios e na aplicação da nanotecnologia a partir de micropartículas de prata. Além do efeito antiviral, conta com efeitos antifúngicos, antiácaros e antibacterianos, além de contar com repelente a líquidos, sendo ideal para confecções com propriedades antialérgicas. Tecido ideal para confecção de uniformes, almofadas, travesseiros, além de ser versátil para o artesanato.
